Contains EZA (Amylase, Protease, Lipase, and Cellulase) ADPT: Elethero (Siberian Ginseng), Reishi (Ganoderma Mushroom), Jiaogulan, Cordyceps and Rhodiola Rosea.

Other ingredients: Gelatin capsule
(Contains no known allergens)

DETAILS

Unlike most allergy relief medicines that suppress the immune system, Breathe contains a proprietary blend of key ingredients designed to support the immune system. Our blend of Bitter Orange Fruit Extract, or Citrus Aurantium, with the active ingredient of synephrine, is known as an anti-inflammatory support. Breathe supports the soothing of swollen and irritated mucous linings of the respiratory system.

The synthesis of specific enzymes is the underlying cause of many allergic reactions; our ingredient Quercetin supports the inhibition of this synthesis. Guarana produces a stimulating effect due to the presence of purines (caffeine, theobromine, theophylline). It supports relaxation of the vascular muscles and bronchial tubes.

By supporting the reduction of mucus production, Fenugreek helps asthma and sinus problems. Fenugreek has been known to be used by Native Americans for coughs, lung disorders, fever, bronchitis, colitis, and vomiting.

Goldenseal supports the immune system, said to have anti-inflammatory and anti-bacterial properties.

Often used for their aromatic and decongestant properties, Eucalyptus leaves inhibit prostaglandin biosynthesis and support a mild expectorant and antispasmodic to relieve cough and congestion..
