Other ingredients: Gelatin capsules
(Contains no known allergens)

DETAILS

This powerful combination of supporting plants for the circulatory system, especially the heart, combined with Co-Q 10 set this product apart from other cardio supplement on the market.

Heart contains Hawthorne berry extract, a good source of bio-flavonoids and Vitamins A, C, and E to support a healthy heart function.

Motherwort contained in Heart supports the relief of nervous tension and muscle rigidity while supporting proper heart palpitation.

Co-Q 10, a potent antioxidant, is used to support manufacture of the basic energy molecule in the body's cells, increase the strength of the heart muscle, and boost the immune system.
