Contains EZA (Amylase, Protease, Lipase, and Cellulase) ADP (Astragalus, Ginseng), Reishi (Ganoderma Mushroom), Jiaogulan, Cordyceps

Other ingredients: Gelatin capsules  
(Contains no known allergens)

## DETAILS

Kidneys serve our bodies as a filter, ridding them of toxic materials that are detrimental to our health. A combination of key ingredients in Kidney makes it a great tonic for supporting the kidneys. These ingredients include Horsetail, Plantain Leaf, Hydrangea Root, Foenugreek Seed and Kidney Substance. Working collectively, these ingredients can support kidney function by increasing circulation.

A bovine source of kidney substance is included in Kidney because of its stimulating support that kicks the organ into repair mode while working simultaneously with the other ingredients in this product; it prepares the kidneys metabolically for an intended change.

Horsetail is an herb that contains an abundance of natural silica. It has been used traditionally in Europe as a diuretic for edema (fluid retention).

Plantain supports promotion of healing of kidney and bladder tissues. This plant is also said to work as a diuretic because of its high silica and tannin content.

Foenugreek Seed is soothing to the kidneys and bladder. Foenugreek seed is also known for supporting the break-up of mucus plaque, allowing increased elimination.

All the ingredients in this formula combine together to form a unique and ultimately effective supplement keyed specifically for kidney health.
