(Contains no known allergens)

## DETAILS

Motion with NAG (N-Acetyl) Glucosamine, chondroitin, boron, MSM, White Willow Bark and Mg Salicylate was formulated to support improved muscle and joint function and mobility, decrease pain and inflammation, remove toxins that may create arthritis and increase the chance of degeneration in the joint, improve lubrication of the joints, and improved flexibility and elasticity in the cell walls.

MSM specifically supports the cell wall's permeability, allowing water and nutrients to freely flow into the cells facilitating waste and toxin removal. MSM also is known to support increased blood circulation also improved joint health.
