

# REACTION

## DESIGNED

Reaction is designed to support fast action of the immune system.

DOSAGE Two capsules two times per day

RELATED PRODUCTS GUARDIAN, RESPONSE

## SUPPLEMENT FACTS

Serving size : 2 capsules(1008 mg. capsule)

	Amount per serving	%DV
Vitamin C .....	600 mg.	1,000%
Calcium .....	66 mg.	6.6%
Vitamin A .....	20,000 IU.	400%
Zinc .....	20 mg.	133.2%
Pantothenic acid .....	20 mg.	200%
Vitamin B-12.....	5 mcg.	84%

Proprietary blend: RNA, Citrus Bioflavonoids, Thymus substance, Rosehips, Chlorophyll, and Lymph substance.

Contains EZA (Amylase, Protease, Lipase, and Cellulase) ADPT: Elethero (Siberian Ginseng), Reishi (Ganoderma Mushroom), Jiaogulan, Cordyceps and Rhodiola Rosea.

Other ingredients: Gelatin capsules  
(Contains no known allergens)

## DETAILS

To effectively support the fight against the cold and the flu, it at times requires more than just Vitamin C and increased water intake. Reaction works by combining needed nutrients to support rapid immune response with support to increase protein synthesis, T-cell production, and protection against bacterial and foreign antigens. Lymphoid and thymus tissues have been added to support the body immediately. Important co-factors shift the body into immune building overdrive, supporting a quick recovery from the cold and the flu.

The ingredients formulated in this powerful product contain the nutrients and plants that have been shown to support the immune system. Experience has shown if this formula is taken early at onset of colds and flu, most immune systems have the ability to fight off and/or reduce the duration of sickness.

Reaction is a combination of Vitamin C, Vitamin A, Vitamin B-12, Zinc chelate, Calcium, Pantothenic acid, citrus bioflavonoids, rosehips, chlorophyll, thymus, and lymph substance all essential in producing rapid cell formation, cellular longevity and protein synthesis in the immune system to support tissue growth and repair.

Vitamin C, besides being an antioxidant, is also essential to adrenal gland function, and effective in protecting the body against infections of all types. Vitamin A like Vitamin C it is essential in the maintenance and repair of epithelial tissue.

Zinc chelate, (chelate being a superior form of Zinc that is combined with protein to enhance body absorption) is essential for most all metabolic and energy producing processes performed by the body, especially promoting a healthy immune system.

Study: A random double-blind study showed the effectiveness of Zinc on the common cold. A study of 50 people taking Zinc showed a significantly reduced duration of cold symptoms as compared to those taking a placebo.

Thymus and lymph tissue is a bovine source from Argentina for a clean, natural source which has been known to support a fast reacting RNA response in the immune system.
