(Contains no known allergens)

DETAILS

Our formula is an ancient oriental remedy used in many eastern countries—including China, we feel it is important to understand the roots of the formula. We target supporting the body to improve overall function, in this case supporting proper function of the intestinal tracts. Combining System with regular exercise, this natural formula also provides a quick metabolic support to weight management.

The colon absorbs vitamins, salts, nutrients, and water, and when these essential, life-giving ingredients are properly absorbed, we feel good. But when the colon is not working well it begins to absorb toxins into the bloodstream rather than expel them. The result is a myriad of problems ranging from constipation and gas, to Candida, diverticulitis, and various other chronic health issues. System has been a support for many digestive sufferers.
